

SHITAL

ABRASIVE CONVEYOR BELT POLISHER

MACHINE FEATURES

- **Surface Polishing:** Using different types of polishing tools (such as grinding wheels, felt wheels, cloth wheels, nylon wheels, etc.), various degrees of polishing can be applied to the workpiece, achieving a smooth and aesthetically pleasing finish.
- **Surface Treatment:** Cleaning metal surfaces before electroplating, removing oxides, rust, and other impurities, ensuring the effectiveness of subsequent electroplating processes.
- **Precision Enhancement:** Achieving specific flatness, parallelism, and surface finish through precise processing, commonly used for workpieces that require high surface quality.
- **Multi-functional Polishing:** Depending on the needs, different types of polishing tools can be selected for sanding, mirror polishing, or even brushing.

SPECIFICATIONS

MODEL	150-1
Polishing Thickness	1 - 80 mm
Polishing Width	Max 150 mm
Conveyor Belt Size	6" x 42"
Sanding Belt Size	6" x 36"
Conveyor Motor	120 W / 35 RPM
Main Motor	3 Hp / 415 V / 2800 RPM
Total Weight (Approx)	110 Kg

STANDARD ACCESSORIES

- Conveyor Drive Motor
- Abrasive Drive Motor
- Dust Shield
- Conveyor Belt - 1 Nos
- Sanding Belt - 5 Nos
